Product information

Color: black

Helmet size: L

The CCM HTC 310 TACKS is an ice hockey helmet designed for players who are looking for a comfortable fit with modern protective features for regular practice and games. Available in size L and in black, this model is particularly well-suited for performance-oriented juniors and adults who value a secure fit, ventilation, and a comfortable feel on the ice.

- Technology: R3FLEX Protection
- Protection Concept: Dynamic impact management with dual-density foam
- Inner Lining: Full-coverage, 3D-molded lining
- Construction: lightweight helmet shell with a sleek, low profile
- Ventilation: ventilated design for continuous air circulation
- Fit: Designed for a comfortable and secure fit
- Size: L
- Color: black

On the ice, the difference is most noticeable when practice sessions get longer or the pace of the game remains high. The 3D-molded inner lining provides a flat, even fit, while the combination of R3FLEX Protection and double-density foam offers support exactly where controlled cushioning is particularly important in a hockey helmet. At the same time, the ventilated, lightweight construction helps keep the head more comfortable even during intense periods of play. The relatively deep, compact shell shape sits close to the head and is a good fit for players who prefer a modern, athletic look.

When choosing a helmet, the most important factor is selecting the right size so that the fit and protection work together seamlessly.
