Product information

SISU PROTECH DENT is a mouthguard designed for everyday hockey play, where a comfortable fit and ease of use are key. The JR model in blue is designed primarily for younger players who wear a mouthguard during practice and games and are looking for a model that can be easily integrated into their gear.

- Product Type: Mouthguard for hockey and other contact sports
- Model: Protech Dent
- Size: JR
- Color: blue
- Age group: Youth
- Variants: Also available in SR as well as in yellow, green, orange, pink, red, black, and white

Especially in youth hockey, equipment that's ready to use with minimal effort and holds up to regular indoor or outdoor play is essential. A mouthguard like this is therefore a staple of many teams' basic gear. The JR size makes it easy to select the right fit for children and youth, while the blue design blends seamlessly with existing equipment. For parents, coaches, and clubs, it's especially important that the size matches the player's age and dental development and that the mouthguard is reliably available for every practice.

When selecting a mouthguard, the appropriate size—either JR or SR—should be chosen based on the player's age and the shape of their mouth.
