## Product information

---

- Color: blue
- Uses: Hockey, practice, and games
- Benefits: Secure fit and even lacing

In hockey, in particular, a properly laced skate makes a difference because the foot needs to remain stable in the skate during changes of direction, stops, and quick starts. The waxed surface helps ensure the laces are tightened evenly and stay secure during everyday use on the ice or in the rink. This is particularly beneficial for club players and youth athletes, whose equipment is used regularly and who need a simple, reliable solution.

When choosing, the most important factor is selecting the right length for the specific boot model and the number of eyelets.
