Product information

- Color: red
- Applications: Hockey shoes and athletic shoes with high lacing
- Benefits: Secure hold and controlled lacing

A waxed lacing cord makes a noticeable difference, especially during practice and on game days, because it allows for more precise tightening and a snugger fit inside the shoe. This is particularly beneficial for club players, youth players, and parents when a worn-out or too-short lacing cord needs to be replaced. The 274 cm length works well with shoes that have many eyelets and provides enough extra length for a full lacing all the way to the top.

When choosing, the most important factors are the required length of your current laces and the number of eyelets on the shoe.
