Product information

INTERHOCKEY ISOLIERBAND SP GRIP is a classic hockey tape for sticks and minor equipment adjustments. The blue version, 38 mm wide and 4.57 m long, is ideal for everyday training and games when you need to make quick, neat repairs to the grip area or other parts of your equipment.

- Product Type: Insulating tape for hockey
- Version: SP Grip
- Width: 38 mm
- Length: 4.57 m
- Color: blue
- Other color options: red, white
- Applications: Racket grip and general taping work on hockey equipment

Especially in club sports, equipment that's ready to use right away is essential. Tape of this width can be applied to the grip quickly and evenly, which is convenient for regular re-taping during practice. The name "SP Grip" indicates that it's designed for a secure grip—exactly what's needed on a hockey stick to maintain a consistent feel in the hand. This tape is also an obvious choice for teams, coaches, or parents who want to keep equipment in good condition as they move it between the arena, locker room, and playing field.

Before making a selection, it's worth taking a quick look at the desired tape width and preferred color among the available options.
