Product information

The EXEL XC FORMULA QC QBS BLACK/RED is a cross-country ski pole designed for athletic skiers who seek a direct, clean pole feel during training and on the trail. The black/red colorway, 8.5 mm shaft diameter, and 140 cm length clearly classify this model as an XC pole. The name also includes two EXEL-specific system designations—QC and QBS—which indicate that this model is equipped with these features.

- Product Type: XC Cross-Country Ski Pole
- Model: Formula QC QBS
- System: QC and QBS
- Construction: Shaft with 8.5 mm diameter
- Length: 140 cm
- Color: black/red
- IntendedUse: Cross-country training and trails

Especially during repeated pole plant sequences—as are common in regular club training or during longer sessions—a balanced mix of control, rhythm, and reliable handling is essential. This is exactly where this model fits the bill: not as a generic, run-of-the-mill pole, but as a clearly defined XC model with a sporty focus. The 140 cm length is particularly relevant for skiers who tailor their equipment specifically to their technique and movement patterns.

An important factor in selecting the right poles is choosing the appropriate length in relation to your height and preferred cross-country skiing technique.
