9 in stock

Stock type: Pair

MARSBLADE KUFE I2 is a replacement blade for the I2 chassis and is designed for players and clubs who want to keep their off-ice or inline setup in top condition. Measuring 246 mm in length and sold as a pair, this model is ideal for situations where a precisely matched blade replacement is required without unnecessary trial and error.

- Product Type: Replacement blade for Marsblade I2
- System: Compatible with the I2 chassis
- Length: 246 mm

## Product information

---

- Variant: Pair
- Application: Replacement of worn or damaged skates
- Installation: Compatible with the designated I2 mounting

Especially during regular training, replacing parts with the right replacements makes a noticeable difference. When the original blades show signs of wear or need to be replaced after intensive use, the matched I2 version helps maintain the familiar skating and training feel. This is especially important in everyday club use, where equipment changes should be straightforward and the setup should continue to function without lengthy adjustments.

Before installation, it's worth quickly checking the fit with your existing Marsblade I2 chassis and verifying the required length of 246 mm.
