TRUE SOHLE GENETIX LOW ARCH is an insole designed for hockey skates with a flatter arch. Especially during regular training or long sessions on the ice, the right support inside the skate makes a noticeable difference because the foot stays more stable in the skate and power transfer remains more efficient.

- Product Type: Insoles for hockey skates
- Design: Low Arch for a lower arch
- Applications: Training, games, and general shoe customization in hockey
- Fit: Designed to provide support for a flatter foot profile
- Sizes: EU 1-4.5, 5-7, 8-9, 10-11

Product information

- Model Series: Genetix

In hockey, it's not just the shoe itself that matters, but also how securely and stably the foot sits inside it. A low-arch insole is primarily designed for youth players and club players for whom the standard insole isn't sufficiently tailored to a flatter arch. This can be particularly important during quick changes of direction, when accelerating, and during intense training weeks. The Genetix model is designed specifically for these situations and helps to tailor the fit within the shoe more precisely.

It is important to choose the correct size based on the hockey shoe being worn. Using the listed EU sizes, you can select the insole that specifically matches your shoe size.
