Stock type: Pair

The CCM SPEEDBLADE XS1 +2 MM blade is a replacement blade for ice hockey skates with an XS mount and is primarily designed for club players who need to change blades quickly during regular training or games. The 215 mm version is sold as a pair and is +2 mm taller than the standard height, providing additional leeway for regrounding.

- Product Type: Replacement blade for ice hockey skates
- System: SpeedBlade XS1
- Compatibility: Fits XS blade mount

Product information

- Variant: +2 mm compared to standard height
- Length: 215 mm
- Package Contents: 1 pair of blades

Especially for regular ice use, a reliable replacement blade is more than just a spare in your locker. The slightly taller version is particularly useful when blades are sharpened frequently but you still want to maintain your usual skating feel. For club players who want to fine-tune their skates, the extra material provides more leeway across multiple sharpening cycles. As a pair, the blades are designed for a complete replacement, which is significantly more practical for everyday hockey than individual replacement parts.

It's important to ensure the correct length of 215 mm as well as compatibility with the existing XS blade holder.
