TRUE SHIFT MAX HOLDER is a holder for the SHIFT system and is offered here as a single unit in the MAX version, which is 230 mm long. These replacement parts are particularly useful for players and clubs when a holder needs to be replaced or an existing setup needs to be properly repaired.

- Product Type: Holder for ice hockey skates
- System: TRUE SHIFT
- Version: MAX
- Length: 230 mm
- Package Contents: 1 piece

Product information

- IntendedUse: Replacement or swap-out for a compatible skate setup

Especially during regular training and games, it's crucial that a blade holder's length and system match the existing skate. The 230-mm version is designed for setups that require exactly this measurement. As a single holder, this part is particularly suitable when a specific replacement is needed and a complete set is not required. For equipment managers at clubs or for players with precisely tailored gear, this is a practical and functional solution.

Before installation, the skate, SHIFT system, and the required holder length should match exactly.
