Shoe width: D (Regular)

The GRAF G855 SR is a classic ice skate for everyday hockey use, shown here in black and red and in the regular width (D) version. Especially for young players, it's important to have a model that fits well, provides proper foot support, and offers a reliable feel during practice and those first more intense sessions on the ice.

- Product Type: Ice Hockey Skate
- Model: G 855 SR
- Fit: D width, regular

## Product information

---

- Color: black-red
- Sizes: European 32 to 47
- IntendedUse: Training, club sports, and regular ice time

This model is primarily designed for players looking for a snug, sport-oriented fit on the ice without having to switch to a narrower last. The D width is a popular choice for a standard foot and helps strike a good balance between support and freedom of movement. This is especially important when skating on the ice involves not just skating in a straight line, but also tight turns, stops, and quick changes of direction as part of everyday training. The clear sizing progression is also helpful for parents of young players when looking for the next appropriate size within a familiar fit.

When selecting a pair, it's worth taking a close look at the length and width to ensure the skate fits securely in the heel area and doesn't have too much unnecessary slack in the toe box.
