Product information

Shoe width: W (Wide)

The TRUE TF9 SR is an ice hockey skate designed for ambitious players looking for a snug, snug fit and a lightweight overall design. The wide (W) version of this model is specifically designed for skaters who need more room in the forefoot without sacrificing a sporty, precise fit.

- Technology: TRUESHELL one-piece shell made of carbon fiber and thermoplastic, thermoformable
- Construction: one-piece boot to reduce weak spots in high-stress areas
- Mounting: SHIFT mounting
- Tongue: adjustable tongue system with Pro-Grade tongue and T-Guard insert
- Lining: antimicrobial and moisture-wicking
- Padding: Multi-density foam for greater comfort
- Fit: anatomically shaped, width W
- Sizes: Skate sizes 6 through 11.5

On the ice, the design really shines when quick changes of direction, tight turns, and clean traction are required. The thermoformable shell hugs the foot closely, which can make the skating feel more direct than with classic multi-piece constructions. Added to this are the moisture-wicking inner lining and multi-layer padding, which ensure a comfortable fit even during regular training sessions. The adjustable tongue system helps tailor the fit specifically to the instep and freedom of movement.

When selecting a pair, it's worth taking a close look at the width and skate size, especially if you need more room in the forefoot.
