Product information

Stick size: INT

Color: black

The CCM RBZ FT1 INT is a hockey stick designed for performance-oriented intermediate-level players who prefer an exceptionally lightweight, responsive setup for shots and direct finishes. The shaft remains active all the way into the blade, ensuring clean energy transfer and giving the stick a lively feel during fast-paced play.

- Technology: Powerhose 2 with a design that extends deeper into the blade
- Kick Point: Custom Kick Point profile for optimized energy flow
- Head Construction: Faceplate FT1 with increased stiffness
- Reinforcement: Technora with aramid fibers for greater durability
- Weight: approx. 425 g
- Curvature: 28, 29, or 30
- Hardness: 55 or 65
- Variant: INT, left or right, black

The combination of low weight, a reinforced shaft, and a stiff blade really makes a difference, especially during regular practice and in demanding games. The puck releases quickly, shots come directly from the motion, and the feel of the stick remains crisp even under repeated stress. The lower attachment point to the blade is particularly beneficial for shooters who want to generate speed with minimal wind-up.

When selecting a stick, the most important factors are the appropriate blade orientation, the desired curvature, and the stiffness rating (55 or 65), all tailored to your playing style and strength level.
