Color: black

Stick size: SR

The TRUE CATALYST 9X3 SR is a lightweight hockey stick designed for players who want a direct feel for the puck during regular practice and games without sacrificing stability. The Catalyst line is designed for light weight, ensuring that shots, passes, and quick changes of direction remain effortless when executed with the wrist.

- Technology: PLD, PASS, and BAT technologies
 - Construction: Woven mesh for increased overall strength with reduced weight
-

Product information

- Kick Point: Mid kick point with flex in the mid-zone
- Taper Zone: Stiffer transition for controlled shot release
- Shaft Shape: Double concave with square corners
- Grip: Soft, glossy grip
- Blade surface: Matte
- Variant: SR, black, available in T27, T28, or T92 bend profiles, as well as in 65, 75, 85, or 95 flex, left- or right-handed

On the ice, this model's balance really shines when you want a stick that feels light in your hand yet still performs with stability. The mid-kick point builds noticeable power in the middle zone, which aids in long-range shots and powerful passes, while the stiffer taper zone provides greater blade stability. Added to this is the distinctive shaft shape, which feels clearly defined when gripped and suits many club players during their intense daily training routines.

When selecting a stick, pay attention to the blade orientation, bend, and the appropriate flex for your playing style and physical strength.
