in Delivery between **Thu 29. Oct - Mon 02. Nov 2026**

More than 10 in stock

Color: black

Stick size: SR

The FISCHER RC ONE XPRO SR is a high-end hockey stick designed for performance-oriented players who need every shot and every first pass to be on target, even under pressure. The one-piece construction is designed for direct energy transfer, ensuring that as little of the applied momentum as possible is lost and that the puck comes off the blade cleanly.

- Product Type: Performance hockey stick for field players
- Construction: one-piece for direct power transfer

Product information

- Technology: Fiber arrangement with fast puck release
- Blade: Integrated carbon bridges to stabilize the blade
- On-ice benefits: supports hard shots and precise passes
- Curvature: 28 or 92
- Hardness: 65, 75, 85, or 95
- Model: SR, left or right, black

On the ice, the difference is most noticeable during fast-paced plays: on direct shots, on passes while moving, and when you need to release the puck quickly. The special alignment of the fibers accelerates precisely this moment, while the stabilized blade brings more control to the puck. This is particularly well-suited for experienced club players and ambitious athletes who deliberately tailor their sticks based on flex, curvature, and blade orientation.

When selecting a stick, it's worth taking a close look at stiffness, curvature, and whether it's a left- or right-handed model to ensure the setup matches your playing style.
