Product information

Protection size-1: JR

CCM TACKS XR 80 JR shoulder pads are designed for young players who are looking for reliable protection during practice and games without feeling restricted in their movement. The slim, game-ready design stays close to the body and is well-suited to an active hockey style with frequent changes of direction.

- Construction: Two-layer front with PE foam and sublimated comfort lining
- Shoulder protection: Flat, injection-molded JDP shoulder caps with foam padding
- Torso: Compression-molded front and back panels
- Back construction: One-piece back base with PE spine protection
- Range of Motion: Flat design with good mobility in the shoulder and upper body areas
- IntendedUse: Competitive junior ice hockey
- Sizes: JR in S, M, and L

In everyday hockey, it's not just about coverage—it's also about how natural the equipment feels. That's exactly where this model comes in: The JDP shoulder pads help redirect impact forces away from the shoulders, while the contoured body panels remain flexible during skating, turning, and playing along the boards. The inner lining contributes to a comfortable fit, even when the pace picks up during practice or when multiple ice sessions are on the schedule.

When it comes to junior shoulder pads, it's worth taking a close look at the right size to ensure that the shoulder caps, chest area, and back fit properly.
