2 in stock

Color: black/silver

The CCM FM 780 Visor is a hockey helmet visor designed for players who don't want to settle for just any model when upgrading or replacing their visor. Especially during regular training and games, an unobstructed field of vision is just as important as a comfortable fit around the chin. This is exactly where this face guard comes in, with its sleek design and well-engineered chin guard.

- Product Type: Face guard for hockey helmets
- Construction: thin alloy with a flat bar design

Product information

- Field of view: designed for maximum visibility
- Protection concept: Balanced combination of visibility and protection
- Chin guard: with integrated D3O Smart Foam
- Fit: Shock-absorbing with a memory foam-like feel
- Color: black/silver
- Sizes: S, M, L

During gameplay, the flat, stick-like shape is particularly noticeable when you need to quickly shift your gaze between the puck, teammates, and opponents. The slim alloy design keeps the field of vision open without compromising the fundamental protective purpose of a cage. Added to this is the chin guard with D3O Smart Foam, which provides a more comfortable fit during everyday use on the ice and is designed to absorb impacts to the chin area more effectively than standard solutions.

It's important to choose the right size to fit your existing helmet. The model is available in S, M, and L.
