Product information

Color: red

The CCM HT 310 TACKS WIDE ROT is an ice hockey helmet designed for players who are looking for a comfortable fit with modern protective features for regular practice and games. The wide fit provides more space, while the 3D-molded inner lining fully envelops the head and keeps the helmet securely in place even at high speeds.

- Technology: R3FLEX Protection
- Protective Construction: dual-density foams for dynamic impact management
- Lining: fully covering and 3D-molded
- Construction: lightweight shell with a slim, deep profile
- Ventilation: ventilated design for constant air circulation
- Fit: Wide, with a wider fit
- Color: red
- Sizes: S, M, L

For club players and performance-oriented youth players in particular, it's crucial in everyday hockey that a helmet not only provides protection but is also comfortable to wear during long shifts on the ice. This is exactly where this model shines: The combination of R3FLEX Protection, double-density foam, and a ventilated, lightweight design blends comfort with a well-engineered helmet structure for intense practices, early-season tournaments, and close games in the evening. The low-profile shell design looks modern and fits snugly on the head without adding unnecessary bulk.

When choosing a size, fit is just as important as head circumference: The Wide version is ideal for head shapes that need a little more room on the sides.
