Product information

Color: white

The CCM HT 310 TACKS WIDE WHITE is an ice hockey helmet designed for players who are looking for a wide fit, a secure fit, and a modern, lightweight feel during practice and games. Especially during regular ice time, it's important that a helmet stays securely in place, is well-ventilated, and remains comfortable even during longer sessions.

- Technology: R3FLEX Protection with dynamic impact management
- Inner Lining: 3D-molded and fully covering
- Foam: dual-density padding
- Construction: lightweight, ventilated helmet shell
- Fit: Wide, designed for broader head shapes
- Shape: Sleek, low-profile shell
- Color: white
- Sizes: S, M, L

In everyday hockey play, this combination really shines when speed, quick changes of direction, and tight game situations all come together. The full-coverage inner lining provides even support, while the dual-density foam construction and R3FLEX deliver targeted cushioning where it's needed most. The ventilated design helps keep the head from feeling stuffy, even during intense play. For young players with a demanding schedule as well as club players, this is a well-thought-out solution when fit is just as crucial as a sense of protection.

The Wide version is designed for wider head shapes; when selecting a size, it's worth carefully comparing it to your head circumference.
