Product information

Color: red

The CCM HTC 310 TACKS RED is an ice hockey helmet designed for players who are looking for a secure, comfortable fit with a modern, lightweight design for regular practice and games. This model really shines in everyday club play, when a helmet needs to stay securely in place during long practice sessions without adding unnecessary weight.

- Technology: R3FLEX Protection
- Inner Lining: Full-coverage and 3D-molded
- Cushioning: dual-density foams for dynamic impact management
- Construction: Lightweight, ventilated helmet shell
- Fit: Slim, low-profile shape
- Intended Use: Training, tournaments, and competitive play
- Color: red
- Sizes: S, M, L

The combination of a 3D-molded inner lining, double-density foam construction, and R3FLEX Protection is designed for performance-oriented players as well as ambitious youth players who prioritize comfort and freedom of movement alongside protection. The ventilated design promotes comfortable airflow, which is particularly noticeable during intense training sessions and consecutive games. Added to this is the compact shell shape, which fits snugly around the head and offers a sporty, modern look on the ice.

When choosing a size, it's worth taking a close look at your head circumference to ensure the helmet fits securely and evenly.
