Product information

Protection size-1: SR

The CCM TACKS XF PRO SR is a shoulder protector designed for senior players, with a clear focus on high protection and freedom of movement. Especially during intense training and games, it's crucial that the shoulder cap fits snugly, the front doesn't restrict movement, and the upper body remains mobile even during physical play.

- Technology: D3O Zero in the shoulder and AC joint, as well as in the plexus and lower back areas
- Protection Area: MAX Coverage ASD with floating sternum and spine shields
- Range of Motion: Amplified Mobility Design for greater freedom of movement in the upper body
- Construction: Molded Zotefoam side panels and HD-molded foam padding
- Ventilation: Air channels and sweat-wicking Zotefoam lining
- Fit: Adjustable ADPTFIT straps and removable, adjustable padding
- Age group: SR
- Sizes: S, M, L, XL

On the ice, this model's strength really shines when there's a lot of contact and the shoulder protection still needs to work discreetly. The flexible design supports natural arm and shoulder movement, while the additional coverage on the chest, spine, and Seiter enhances the sense of protection. Added to this is a lining that wicks away moisture and, together with the ventilation channels, ensures a more comfortable climate in the shoulder area.

When selecting a size, it's worth taking a close look at the desired fit in the chest and shoulder areas, especially if you'll be wearing other tightly fitted gear underneath.
