Product information

Glove color: black

TRUE CATALYST 5X3 BLACK JR is a junior hockey glove designed for young players who need a combination of agility on the ice and a natural feel for the stick. The black design has a understated look, but the primary focus here is on its classification as a glove for junior players.

- Product Type: Junior Ice Hockey Gloves
- Model: Catalyst 5X3
- Agegroup: JR
- Color: black
- Size: 10 inches, 11 inches, 12 inches
- IntendedUse: Training and games for youth players
- Fit: Designed for junior sizes

In youth hockey in particular, it's important that a glove not only provides protection but also allows for a natural grip on the stick. This is precisely where a junior model like the TRUE HG Catalyst 5X3 fits perfectly. This provides parents and club players with clear guidance when looking for the right hockey equipment for regular practice or games. Sizes ranging from 10 to 12 inches cover typical intermediate sizes in the junior range and help adapt the equipment to a player's growth and skill level.

When making a selection, it's worth taking a close look at the player's current glove size to ensure the fit and range of motion match their current equipment setup.
