Product information

Glove color: black

TRUE CATALYST 5X JR is a junior hockey glove designed for young players looking for flexible, snug-fitting gear for practice and games. The tapered fit keeps the glove closer to the hand, which noticeably improves stick handling and quick movements. In black, the model has a simple, sporty look.

- Product Type: Junior hockey glove
- Construction: PRO GRADE variable foam construction with PE inserts
- Outer material: Nylon
- Palm: Nash palm
- Fit: tapered cut
- Thumb: Two-piece construction
- Lining: Antimicrobial
- Sizes: 10 inches, 11 inches, 12 inches

Especially in junior sports, equipment that effectively combines protection and flexibility is essential. The variable foam construction with PE inserts provides support in high-impact areas without making the glove feel unnecessarily stiff. This is complemented by the two-piece thumb construction, which allows for greater freedom of movement around the stick. The Nash palm provides a direct feel for the stick, which is important for passing, receiving, and shooting in everyday indoor or field hockey. The nylon outer shell is a proven choice for daily club play.

To find the right fit, it's worth checking your hand size and considering how snug you want the glove to fit.
