Product information

REEBOK GLOVE LACES / PER METER are designed as replacement or retrofit parts for goalkeeping gloves and are ideal for goalkeepers, teams, and equipment managers who want to keep their gear in top condition. The white version is ideal for selectively replacing worn-out laces on the catching glove without having to replace entire parts.

- Product Type: Laces for the catching glove
- Application: Goalie equipment in hockey
- Sold: by the meter
- Color: white
- Use: For replacing or renewing existing lacing
- Compatibility: For catching gloves with matching lacing guides
- PackageContents: Sold by the meter

Especially with goalie equipment, intact lacing makes a noticeable difference during daily practice and club activities. Lacing sold by the meter is convenient when only individual sections need to be replaced or a custom length is required. This saves material and makes it easier to repair your own catching glove or multiple gloves in the team's inventory.

Before replacing the laces, briefly check which length and thickness are compatible with your current goalie glove and the existing lacing system.
