Product information

Stock type: Pair

TRUE KUF SPEED SHIFT DLC is a replacement blade for TRUE skates with a Speed Shift mount and is clearly designed for club players and ambitious hockey players who value a responsive skating feel during practice and games. The DLC coating provides a hard, durable surface and helps maintain the blade's sharpness for longer.

- Product Type: Replacement blade for ice hockey skates
- System: Compatible with TRUE Speed Shift holders
- Coating: DLC surface for high durability
- Glide Performance: Excellent glide on the ice
- Feel: Direct skating feel
- Intended Use: Intensive training and game play
- Package contents: 1 pair
- Size guide: Measure the length in mm on your current holder or runner

A durable blade quickly proves its worth, especially with regular use on ice. The combination of a robust design and DLC coating ensures consistent performance over many sessions, which is particularly important in hockey with frequent changes of direction, quick starts, and tight edge work. Added to this is the Speed Shift System, which makes blade changes straightforward when quick action is needed during club practice or around game time.

An important factor in selecting the right blade is the correct length in millimeters, which is stamped on the existing holder or runner.
