Product information

Player hardness: 60
Color: black
Stick size: INT

The TRUE PROJECT X/2024 INT is a composite hockey stick designed for intermediate-level players who are looking for a direct, responsive feel during practice and games. With a length of 58 inches and a flex rating of 60, this model is ideal for situations where a controllable flex and precise technical execution are key. The black design is simple, with a clear focus on performance on the ice.

- Product Type: Composite Hockey Stick
- Size: INT
- Length: 58 inches
- Stiffness: 60
- Curvature: T28 or T92
- Stick Type: Left- or Right-Handed
- Color: black

This combination is particularly appealing to advanced youth players or casual club players because the stick feels neither too soft nor unnecessarily challenging. The 58-inch length falls within a range where ball control, passes, and shots should be neatly coordinated. With T28 or T92, you can adapt the blade shape to your own playing style, depending on whether your focus is more on controlled ball handling or a familiar blade geometry.

When making your selection, the most important factors are the blade orientation, the desired curvature, and the stiffness that best suits your skill level.
