Product information

Color: black

Stick size: INT

The CCM RIBCOR TRIGGER 10 PRO INT is a performance-oriented hockey stick designed for players who need to get the puck off their stick quickly. The RIBCOR design really shines in tight spaces, on one-timers, and on quick wrist shots.

- Technology: Ultra-low kick point for exceptionally fast shot release
- Construction: Nanolite Shield Carbon Layering for low weight and high durability
- Shaft Geometry: Ergonomic EC shape for a comfortable grip and precise control
- Blade: UL1 blade for a lighter balance and a more direct feel
- Curvature: P28 or P29
- Hardness: 55 or 65
- Blade orientation: Left or Right
- Size: INT, color black

This is particularly noticeable during play when there's little time left to take a shot. The low kick point supports an explosive shot release, while the lightweight blade makes handling feel smoother during puck contact and shot preparation. Added to this is a shaft shape that sits securely in the hand and provides control during quick movements. For ambitious youth and club players in the INT category, this stick is clearly designed for speed, precision, and a direct feel on the ice.

When selecting a stick, the blade orientation, curvature, and stiffness should match your playing style and physical strength.
