Product information

Color: black

Stick size: SR

The CCM JETSPEED FT9 PRO SR is a senior hockey stick designed for players seeking direct feedback and a clean shot at high speeds. Its balanced design really shines in everyday club play, where quick shots, tight puck control, and split-second decisions all come together.

- Technology: Hybrid kickpoint with a hinge effect for quick loading and a responsive shot
- Construction: ALUPLI Composite with aluminum layers and carbon fibers
- Shaft Shape: Round “R” geometry with rounded corners and concave sides
- Blade: Dual-Control Blade with X-Soft heel for precise puck feel
- Curvature: P28+1/4 or P29+1/4
- Hardness: 70, 75, or 85
- Version: Left or Right, size SR
- Color: black

This stick is primarily designed for performance-oriented senior players and ambitious club players who don’t want a sluggish stick response. The Hybrid Kickpoint supports shots from various game situations without losing the feel for the puck. Added to this is the Dual-Control blade, which supports controlled handling when receiving, carrying, and making quick passes near the boards or in the slot. The “R” shaft shape feels comfortable and familiar in the hand, which is just as noticeable during practice as it is under game pressure.

When selecting a stick, consider the curvature, stiffness, and whether it’s left- or right-handed to match your playing style and hand position.
