in Delivery between **Thu 29. Oct - Mon 02. Nov 2026**

4 in stock

Product information

Color: black

Stick size: INT

The CCM JETSPEED FT9 PRO INT is a composite hockey stick designed for ambitious youth and club players who are looking for a direct feel for the puck at high speeds. Especially in tight game situations, what matters is how quickly the stick loads and how cleanly shots and passes are executed.

- Technology: Hybrid kickpoint with a hinge effect for quick shot release and responsive feedback
- Construction: ALUPLI composite with aluminum layers and carbon fibers for high impact resistance
- Shaft Shape: Round R-geometry with rounded corners and concave sides
- Blade: Dual-Control blade with X-Soft heel for precise puck feel
- Curvature: P28+1/4 or P29+1/4
- Hardness: 55 or 65
- Seiter: left or right
- Size/Color: INT, black

On the ice, the balance of kick point, shaft shape, and blade really shines when time is tight: quick wrist shots, direct passes, and controlled puck control are executed with greater precision and clear feedback. The rounded R-geometry feels comfortable in the hand, a sensation that remains noticeable even during extended periods on the ice. Added to this is a robust shaft construction designed for regular training and the demands of daily club play.

When selecting a stick, it's worth taking a close look at the stiffness, bend, and blade orientation to ensure the stick matches your playing style and height within the INT category.
