Product information

The TRUE CATALYST 3X4 JR is a junior ice hockey skate designed for young players who are looking for a responsive, agile skating experience during practice and games, without compromising on durability. New for 2024, this model combines TRUE's signature anatomically designed fit with a one-piece shell construction.

- Product Type: Junior Player Skate for Ice Hockey
- Technology: patented one-piece shell construction
- Fit: anatomically shaped for a snug, direct fit
- Feel: Designed for light agility
- IntendedUse: Training and competition at the youth level
- Model Year: 2024
- Sizes: Skate sizes 1 through 3.5, including half sizes

Especially in junior hockey, a skate that fits well makes a big difference on the ice. The one-piece construction brings the foot close to the skate, which noticeably supports changes of direction, explosive first strides, and controlled edge work. At the same time, the model is designed to withstand the regular demands of everyday hockey. For parents and club players, this is an attractive combination when looking for a performance-oriented model with a precise fit without having to move into the highest price range.

When choosing a size, the available half sizes help ensure a more precise fit.
