Product information

Shoe width: W (Wide)

TRUE CATALYST 7X4 WIDE SR is an ice hockey skate designed for ambitious players who seek direct power transfer and a noticeably precise fit during regular practice and games. The anatomically shaped, one-piece shell and thermoformable materials clearly prioritize fit, support, and comfort in the wide (W) version.

- Product Type: Ice hockey skate for players
- Construction: anatomically shaped, one-piece shell
- Customization: thermoformable materials
- Technology: advanced composite construction
- Functionality: optimized support and efficient energy transfer
- Intended Use: Training and intense play at a competitive level
- Fit: Wide / W for extra width in the shoe
- Sizes: SR 7, 7.5, 8, 8.5, 9.5, 10, 10.5

This design really shines during quick changes of direction, powerful strides, and extended time on the ice: The foot sits closer and more securely in the boot, while the shell efficiently transfers movement to the ice. This supports a powerful skating feel without compromising comfort. For club players and performance-oriented adults who need a wider fit, this is particularly relevant in everyday hockey because support and space in the forefoot must go hand in hand.

The wide version is suitable for wider feet; when selecting a size, it helps to compare your previous skate fit with the desired SR size.
