## Product information

---

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST 5X6 JR is a hockey skate designed for young players who train regularly and are looking for more stability, comfort, and a more responsive feel on the ice. The athletic design of this junior model supports quick bursts of speed, tight turns, and clean changes of direction without unnecessarily constricting the foot.

- Product Type: Junior hockey skate
- Fit: Anatomical with the flexible fit of the Catalyst series
- Feel: direct and agile for dynamic skating
- Stability: Designed for regular practices and games
- Intended use: ambitious young players and everyday club play
- Width: R Regular
- Color: black
- Size: EU 33.5 to 36.5, Skate Size 1 to 3.5

Especially for young skaters, the right pair of skates makes a big difference as training becomes more frequent and movements on the ice need to be more precise. This model combines comfortable wear with the stable feel that's essential for repeated starts, stops, and turns. This creates a clean balance of agility and control, just as required for club practices and games. For parents, too, the distinction is clear: this isn't just a basic entry-level model, but a solid step toward more athletic skating.

The regular width fits many feet with a classic shape. When selecting a size, it helps to compare the skate size and EU size directly with your current pair of skates.
