Product information

Shoe width: R (Regular)

TRUE CATALYST 9X4 REGULAR INT is a hockey skate designed for ambitious youth and club players who are looking for a snug fit and quick reactions on the ice. The one-piece shell, featuring moderate stiffness, is designed for a dynamic playing style with tight turns, quick changes of direction, and a natural feel of movement.

- Technology: patented NEUROFIT+ shell made of one-piece carbon fiber
- Construction: one-piece boot construction with a redesigned carbon layer
- Feel: moderate shell stiffness for agility and quick changes of direction
- Customization: highly thermoformable materials for an anatomical fit
- Durability: redesigned side panel with increased abrasion resistance
- Comfort: ready-to-play design with a focus on fit and freedom of movement
- Fit: R / Regular
- Sizes: Skate sizes 4 to 6.5, including half sizes

It's especially during intense training sessions that the precision of the design becomes apparent: The shell fits snugly around the foot, can be easily customized thanks to the thermoformable materials, and thus supports precise power transfer. At the same time, the skate remains flexible enough to ensure that quick edge changes and tight turns aren't hindered. This makes this model particularly appealing to intermediate-level players who train regularly and want to get more out of every stride as they transition to a performance-oriented setup.

The regular fit is suitable for a normal foot width.
