Product information

Shoe color: black
Shoe width: W (Wide)

TRUE CATALYST NITRO REGULAR INT is a hockey skate designed for regular ice time, when training and games call for more support, comfort, and a responsive feel on the ice. The Catalyst line is known for its flexible, anatomical fit, and that's exactly what this model brings to the ice: a secure fit, stable support, and plenty of freedom for dynamic movements.

- Product Type: Hockey skate for field players
- Fit: Anatomical with the flexible fit of the Catalyst series
- Feel: direct and agile for quick bursts of speed and tight turns
- Stability: reliable support during regular practice and games
- Intended use: ambitious recreational hockey and club play
- Shoe width: W (Wide)
- Color: black
- Sizes: Skate Size 4-6.5 / EU 37.5-41

Club players and ambitious recreational players in particular benefit when a skate remains stable during direction changes, responds cleanly during push-offs, and doesn't unnecessarily constrict the foot. That's exactly where this model fits in. The wider W version provides more room in the forefoot area, which can noticeably improve comfort during regular practice sessions without compromising the skate's athletic performance.

When choosing a size, it's worth taking a close look at the skate size and EU size, especially if you're already using hockey socks or insoles that fit well.
