Product information

Shoe width: R (Regular)

TRUE CATALYST 9X4 REGULAR SR is a hockey skate designed for players who are looking for a responsive feel, a snug fit, and reliable durability during practice and games. The one-piece NEUROFIT+ carbon fiber shell creates a tight connection between the foot and the skate, which is noticeable during quick edge changes and tight turns. With its Regular fit, this model is designed for adults in the SR size range who prefer a balanced combination of flexibility and support.

- Technology: Patented NEUROFIT+ shell made of one-piece carbon fiber
- Construction: One-piece shell with an enhanced carbon layer
- Feel: Moderate shell stiffness for agile skating and quick changes of direction
- Customization: Highly thermoformable materials for an anatomical fit
- Durability: Redesigned side panel with increased abrasion resistance
- Comfort: Ready-to-play design with plenty of freedom of movement
- Fit: R / Regular
- Sizes: Skate sizes 7 through 11.5

This design is particularly appealing to ambitious club players: The shell remains responsive without feeling unnecessarily stiff, and supports a modern, dynamic skating style. At the same time, the thermoformable construction helps customize the skate to better fit the shape of your foot, which can make all the difference during regular ice time.

When selecting a pair, pay attention to the SR size and the Regular fit.
