Product information

Shoe color: black

Shoe width: R (Regular)

The CCM VIZION REGULAR SR is an ice hockey skate designed for ambitious players who seek a close connection between their foot, the skate, and their movements on the ice. The highly thermoformable boot conforms very closely to the foot when heated, creating a precise fit, excellent support, and a direct feel during quick bursts of speed, edge changes, and tight turns.

- Product Type: Adult ice hockey skate
- Technology: Highly thermoformable boot
- Fit: Regular, Width R
- Toe area: integrated toe cap with extra room in the forefoot
- Skatingfeel: Direct power transfer and precise fit
- Intended Use: Training and games at an advanced level
- Color: black
- Sizes: Skate sizes 7 through 10.5

Regular training in particular highlights just how important a well-fitting skate is. The design supports a snug, athletic fit without unnecessarily constricting the forefoot. This makes the skate an attractive option for club players who don't want to have to search for stability in their skates when accelerating or changing direction. Add to that the modern, futuristic look that clearly belongs in the current performance class.

When it comes to ice hockey skates, it's important to choose your size carefully, as skate sizes and standard shoe sizes are often not the same.
