Product information

Shoe width: W (Wide)

The TRUE CATALYST 9X4 WIDE SR is a hockey skate designed for performance-oriented players and regular club practice, combining a wide fit, direct power transfer, and a responsive ride. The one-piece shell, featuring the patented NEUROFIT+ carbon fiber construction, delivers a pro-level fit and game-ready comfort in a model that actively supports quick changes of direction.

- Technology: patented NEUROFIT+ shell
- Construction: one-piece carbon fiber shell
- Feel: Moderately tuned shell stiffness for agile maneuvers
- Customization: highly thermoformable materials for an anatomical fit
- Durability: redesigned side panel with higher abrasion resistance
- Material Construction: Improved carbon layer throughout the shell
- Fit: Wide / W for wider feet
- Size: SR, skate sizes 7 to 11.5

The difference compared to simpler skates is particularly evident during intense training and games: The shell stays close to the foot without unnecessarily restricting movement. This helps with acceleration, maneuvering in tight spaces, and during game situations that require precise edge work on the spot. The thermoformable construction makes fine adjustments easy, while the updated side panels and carbon layer are designed to withstand the prolonged stress of everyday hockey play.

The wide version is suitable for wider feet or for players who need more room in the forefoot area.
