Product information

Shoe color: black

Shoe width: W (Wide)

The TRUE CATALYST 5X6 WIDE INT is a hockey skate designed for players who train regularly and are looking for a secure footing on the ice, efficient power transfer, and noticeable comfort. The wide W-width design provides more room inside the boot, while the athletic construction of the Catalyst series combines a responsive feel with a flexible fit.

- Product Type: Hockey skate for regular on-ice use
- Fit: anatomically shaped, in W width for more room in the forefoot area
- Feel: Direct and agile during acceleration, turns, and changes of direction
- Stability: reliable support for practices and games
- Intended use: ambitious recreational play and club activities
- Color: black
- Size: EU 37.5 to 41 / Skate Size 4 to 6.5

Especially in everyday club play, a skate that securely holds the foot in place without applying unnecessary pressure makes sense. That's exactly where this model fits in: enough stability for repeated stress, yet flexible enough for tight turns and quick changes in direction. This is especially helpful for players who are moving beyond a basic recreational model and expect more control over their push-off and edge work on the ice.

The WIDE version is especially suitable for wider feet or for anyone who needs a little more room in the forefoot area.
