Product information

Shoe color: black

Shoe width: W (Wide)

TRUE CATALYST 5X6 WIDE SR is a hockey skate designed for regular ice time, where stability, agility, and a smooth skating feel must all come together. Club players and ambitious recreational players in particular benefit from the anatomical fit of the Catalyst series when quick bursts of speed, tight turns, and controlled changes of direction are required in everyday play.

- Product Type: Hockey skate for field players
- Fit: anatomically shaped with a wider W-width
- Feel on the ice: direct and agile
- Stability: reliable support for practice and games
- Intended use: regular practices and games
- Age group: SR
- Color: black
- Sizes: EU 42 to 45.5 / Skate Size 7 to 10

On the ice, this model's strength really shines when the skate guides the foot securely without unnecessarily restricting movement. It's precisely this balance that makes the CATALYST 5X6 an attractive option for players who train several times a week and are looking for a reliable setup when pushing off and navigating tight turns. The wide design creates more space inside the boot, which significantly improves the fit—especially for players with wider feet.

When choosing a skate, in addition to the length, the right width is especially important to ensure that support and comfort on the ice go hand in hand.
