Product information

Shoe color: black

Shoe width: R (Regular)

The TRUE CATALYST NITRO WIDE INT is a hockey skate designed for regular use on the ice, when a secure, responsive feel is essential during practice and games. The wide fit is designed for players who need more room in the forefoot area without sacrificing stable support and a sporty feel.

- Product Type: Hockey skate for practice and games
- Fit: WIDE INT wide fit with an anatomical shape
- Feel: Direct and agile for acceleration, turns, and changes of direction
- Stability: Designed for regular use on the ice
- Comfort: Secure fit without unnecessary pressure buildup
- Color: black
- Size: EU 37.5 to 41
- Skate Size: 4 to 6.5

Amateur and club players, especially those with high ambitions, quickly notice in their daily hockey routine whether a skate glides smoothly while still allowing enough mobility. That's exactly where this model shines: it offers noticeable support during quick accelerations and tight turns, combined with a fit that keeps the foot securely in place. This is especially helpful during intense training weeks when control and comfort are equally important.

The wide WIDE last is especially suitable for feet that find a regular fit too tight in the forefoot. In addition to the EU size, the specified skate size and the desired width will help you make your selection.
