Product information

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST 3X6 JR is a junior hockey skate designed for young players who train or play regularly and are looking for a noticeably more precise fit than that offered by basic entry-level models. The Catalyst line features an anatomical fit and a flexible skating feel, ensuring that changes in direction, tight turns, and a direct push-off on the ice all work together seamlessly.

- Product Type: Junior Ice Hockey Skate
- Fit: anatomically shaped, width R (Regular)
- Feel: agile and responsive for quick reactions on the ice
- Intended use: regular practice and games
- Stability: solid hold and support in the foot area
- Age group: JR
- Color: black
- Size: EU 33.5 to 36.5, skate size 1 to 3.5

Especially for young players, a well-fitting skate makes all the difference: less unnecessary movement inside the boot, more control when accelerating, and a smoother feel when turning or maneuvering in tight spaces. That's exactly where this model fits in. It's designed for young players and parents looking for a reliable, sport-oriented skate for practice and games without having to go straight to the top-of-the-line models.

When choosing a skate, in addition to length, the Regular fit is particularly helpful when a balanced combination of support and comfort is needed.
