Product information

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST NITRO REGULAR SR is a hockey skate designed for players who train regularly and are looking for a secure footing, direct power transfer, and a flexible fit during games. The Catalyst line is known for its close connection to the ice, and that's exactly what makes this black model appealing to ambitious recreational and club players.

- Product Type: Hockey skate for regular use on the ice
- Fit: anatomically shaped, width R Regular
- Feel: Direct skating feel with agile handling in turns and direction changes
- Stability: Designed for practices and games with reliable support
- Intended use: ambitious recreational play and everyday club use
- Color: black
- EU sizes: 42 to 47.5
- Model: Senior SR

On the ice, what often matters is how snugly the skate fits the foot and how stable it remains during fast movements. This model combines comfort with the stability that becomes essential during frequent sessions. This aids in powerful push-offs, tight turns, and quick transitions without making the foot feel unnecessarily constricted. Especially in club settings, where training and games are closely scheduled, this balance of support and mobility is a clear advantage.

Width R is suitable for a regular fit. To help you choose, compare your EU size with the skate size.
