Product information

Shoe color: black

Shoe width: R (Regular)

TRUE CATALYST 3X6 REGULAR INT is a hockey skate designed for ambitious players who train or play regularly and are looking for a direct, agile skating feel. The Catalyst series is designed for an anatomical fit, ensuring the foot sits securely in the boot and power is transferred to the ice in a controlled manner with every step.

- Product Type: Hockey skate for regular use
- Fit: anatomically shaped, width R Regular
- Feel: agile and responsive for quick changes of direction
- Stability: solid support and reliable grip during gameplay
- Intended Use: Practice and games for ambitious youth and club players
- Model: Intermediate, black
- Sizes: EU 37.5 to 41 / Skate Size 4 to 6.5

Especially when spending a lot of time on the ice, it's important to have a skate that isn't unnecessarily stiff or sluggish. This model combines excellent comfort with a design that supports tight turns, quick edge changes, and active skating. This makes it particularly appealing for players who are switching from a basic recreational skate to a more precise model and expect more feedback from their skates during regular club play.

The regular fit is suitable for feet that are neither particularly narrow nor particularly wide. For the best fit, it's worth comparing your EU size to your skate size.
