Product information

Color: black

Bends: T92

Stick size: JR

TRUE PROJECT X/2024 JR is a junior hockey stick designed for young players looking for the right balance of length, flex, and blade curvature during practice and games. Measuring 50 inches with a T92 curve and featuring a black finish, this model is designed for young field players who prioritize developing proper technique and finding the right stick setup.

- Product Type: Junior field hockey stick
- Length: 50 inches
- Curvature: T92
- Stiffness: 30, 40, or 50
- Blade orientation: left or right
- Size: JR
- Color: black

Especially in junior hockey, the right fit makes all the difference: A 50-inch model in JR size promotes natural handling, while the available hardness options provide flexibility for different stages of development in youth hockey. The T92 bend is ideal for players who want to combine puck control, passing, and shooting with a familiar all-around geometry. This makes the stick well-suited for regular use in everyday club play, as players work to gradually improve their technique and movement patterns.

Key factors to consider when selecting a stick are the appropriate flex and the correct blade orientation—left or right.
