Product information

Player hardness: 50
Color: black
Stick size: JR

The CCM RIBCOR TRIGGER 10 PRO JR is a composite hockey stick designed for ambitious junior players who need to get a quick shot off and control the puck cleanly in tight game situations. The RIBCOR line really shines in youth hockey, where shots taken after brief setups and quick reactions are crucial.

- Technology: Ultra-low kick point for exceptionally fast shot release
- Construction: Nanolite Shield Carbon Layering for low weight and high durability
- Shaft shape: Ergonomic EC geometry for controlled handling
- Blade: UL1 blade for a lighter balance and more precise shot delivery
- Curvature: P28 or P29
- Hardness: 50
- Blade orientation: left or right
- Size/Color: JR in black

The combination of a very low kick point, a lightweight blade, and a well-balanced design supports a style of play focused on speed and quick shots. In practice, this is evident in wrist shots as well as in quick plays after winning the puck. The ergonomic shaft shape fits comfortably in the hand and helps maintain clean passing, puck control, and shooting feel, even when the game gets hectic. This makes this model particularly well-suited for junior club players looking for a responsive stick for offensive plays.

When selecting a stick, be sure to choose the correct blade orientation and the desired curvature (P28 or P29).
