Product information

Protection size-1: SR

CCM TACKS XR SR elbow pads are designed for performance-oriented hockey players who are looking for reliable protection during practice and games without sacrificing mobility when handling the stick. The anatomical design fits snugly against the arm and promotes a natural feel during quick changes of direction, passes, and shots.

- Technology: JDP elbow cup to redirect impact forces away from the joint
- Protection Area: Elbow, forearm, and biceps
- Fit: anatomically shaped for a snug, stable fit
- Construction: Sturdy design with additional padding
- Mobility: flexible bicep protection and a flexible design
- Adjustment: Adjustable straps for a secure fit on the arm
- Size: SR, available in S, M, L, and XL

Physical hockey, in particular, highlights just how important the balance between protection and freedom of movement is. These pads reliably cover the critical areas while remaining flexible enough to ensure the arm isn't restricted. This makes them particularly appealing to players who train regularly and are looking for gear that stays secure and comfortable even during intense sessions. The extra padding helps ensure the pads remain comfortable even during extended periods on the ice.

For a snug fit, the SR size should be chosen to match the arm circumference and the rest of the protective gear.
