Especially in youth hockey, a goalie glove that doesn't unnecessarily complicate movements is essential. A stick glove like the ALPHA S30 YT supports stick control and is one of the pieces of equipment that's constantly involved in every defensive move. For young goalies and their parents, it's therefore often important that the model is clearly designed for youth hockey and isn't simply a scaled-down version of an adult model. In the day-to-day life of a club, with regular practices and first games, this provides a solid foundation for a smooth introduction to playing goalie.

To make the right choice, it's worth checking the age and size classifications for the rest of the goalie equipment.
