Product information

Glove color: black

TRUE HG CATALYST 5X5 JR BLACK is a hockey glove for junior players that clearly prioritizes agility and a direct feel for the stick. This really makes a difference during regular practice and games, when quick hands, clean passes, and controlled shots are essential.

- Product Type: Junior Player Glove
- Technology: 5-piece TRUEMOTION cuff
- Range of motion: high wrist mobility for stick handling, passing, and shooting
- Palm: Nash base lining
- Grip: Nash on the palm, fingertips, and gussets
- IntendedUse: Ice hockey training and games
- Color: black
- Size: 10 inches, 11 inches, 12 inches

The combination of Nash panels and a flexible cuff provides a very responsive feel on the stick without unnecessarily constricting the hand. This is particularly appealing to young club players who expect their equipment to offer not only protection but also precise handling. In everyday play on the ice, the advantage is particularly evident during tight puck control, quick wrist passes, and shots where the hands need to move freely. Compared to basic entry-level models, the design feels noticeably sportier and more responsive.

When choosing the right size, the glove size range of 10 to 12 inches helps ensure that the fit and range of motion match junior equipment.
