Glove color: black

The TRUE CATALYST 5X5 SR in black is an ice hockey glove designed for players who seek a direct stick feel and a flexible wrist during regular practice and games. Especially when it comes to quick passes, tight puck control, and repeated shots, a design that seamlessly combines protection, grip, and freedom of movement is essential.

- Technology: 5-piece TRUEMOTION cuff
- Grip: Nash base padding on the palm, fingertips, and gussets
- Mobility: High wrist mobility for stick handling, passes, and shots
- IntendedUse: Ice hockey, practice, and games
- Fit: Senior SR model
- Color: black
- Size: 13 inches or 14 inches

During the game, the combination of a responsive grip and a loose cuff is particularly noticeable. The Nash panels provide a consistent feel on the stick without making the glove feel stiff. At the same time, the 5-piece cuff gives the wrist more room, which is noticeable when catching passes, making quick re-grips, and during the shooting motion. This model is therefore particularly suited for ambitious club players who expect more than a simple standard design but still want to stay within a reasonable price range.

When choosing a size, the 13-inch and 14-inch options—classic adult sizes—help ensure the right balance of fit and mobility.
