Product information

Goalkeeper color: black

Goalkeeper size: INT

WARRIOR X5 RTL INT is a goalie chest protector designed for goalies who prioritize a flexible fit and generous coverage in the goal area during practice and games. Especially during tight plays in front of the net, in RVH positions, and when facing shots from awkward angles, a design that seamlessly combines protection and mobility is essential.

- Technology: AxyFlex2 arm design for high mobility with a compact silhouette
- Protection package: Strategically constructed internally with HyperComp and lightweight HD foams
- Shoulder construction: CoverEDGE+ with HyperComp-reinforced shoulder pads that extend seamlessly to the chest area
- Adjustment: Removable shoulder pad for individual adjustment of shoulder height
- Arm connection: Neoprene connectors between the triceps, elbow, and forearm areas to minimize gaps
- Fit: Velcro adjustments on shoulders, back panel, sides, and torso
- Size: INT, shooter L/XL, M/L, or S/M
- Color: black

In everyday hockey play, the interplay between the flexible arms and the wide shoulder coverage is particularly noticeable. The chest protector stays close to the body without unnecessarily restricting movement in the goal area and supports a stable posture during lateral movements and close-range shots. The connecting elements in the arm area help minimize gaps, which is particularly noticeable during frequent changes of direction.

When selecting a size, the chest protector should be properly coordinated with the rest of the goalie's equipment.
